Preface

The international conference "Applied Electronics" is a regular event, organized yearly from 1996 by the University of West Bohemia – Faculty of Electrical Engineering. Our aim is to provide a forum for researchers and practitioners interested in advances in the wide scope of electronic circuits and systems, especially in applications of theoretical research.

All the papers have been reviewed for acceptance by the members of the International Program Committee in a double-blind reviewing procedure. The accepted papers are published in the Proceedings in the form in which they were received. The organizers assume no liability for the accuracy of information herein.

I would like to thank the members of the Program Committee for their careful reviews of the submitted papers.

Our thanks belong to the Institute of Electrical and Electronics Engineers – Industrial Electronics Society (IEEE – IES) and to the Czechoslovakia Section of IEEE for their technical co-sponsorship, and to the University of West Bohemia for its wide-ranging support.

I must also express my gratitude and appreciation to all those who prepared this conference, especially to the members of the Organizing Committee.
